Title: Pet Get

Description: A website for animal shelters that both the animal shelter staff and potential adopters can use. Staff can update what animals are available or not, and customers can view the animals and apply for adoption.

Actors: Animal shelter staff, customers(adopting pets)

Functionality:

- Customers can sign up and log in
- Customers can view all the current animals available for adoption
- Shelter staff can log in
- Shelter staff can add and subtract animals are available to adopt
- Shelter staff can search for specific animals by name or ID number
- Shelter staff can approve or deny adoption requests
- Customers can apply to adopt certain pets
- Customers can view pending approvals for adoptions
- Animal pages that display each animal's information. Eg: name, species, age, personality, health issues
- Sort animals by species or breed. As in split up dog and cat breeds, group rabbits together, and reptiles together etc.
- Shelter staff can view customer's application for pets

Stretch Functionality:

- Include database for storing all the current animals
- Featured animals of the day, showcasing one the shelters animals
- Donation button for the shelter
